Company: Trico Electric Cooperative, Inc.

Nature Of Opinion

Docket Number: E-01461A-15-0363

Docket Position: For

STOP Net Metering and banking!!! STOP REST charges!!! I am against Trico members with solar net metering having the ability to save their excess generation for current and future bills, essentially receiving the retail rate for ALL the energy they generate. It makes no business sense for Trico to pay more for power when they can purchase it for less from AEPCO or the power market. Net metering reduces Trico's revenues, which reduces Trico's margins. Margins belong to all members in the form of capital credits. Members who net meter receive their share of capital credits PLUS the retail rate for the excess generation they bank for future use. This is definitely not fair and equitable. Furthermore, because their energy usage is low, net metered members pay less into the REST...so they aren't even contributing to help others achieve what they already have. The choice to install renewable distributive generation is an individual's decision and should not impact other rate payers.
